## PRODUCT OVERVIEW

The ISC Squirrel FLEX Tether is designed to offer the optimal balance of rigidity and flexibility for SRT Climbing with your Rope Wrench.

The Squirrel FLEX is made from a high-quality kernmantle rope, over-moulded with an advanced Polymer, selected to create a rigid tether that allows just the right amount of flex and an ultra-premium finish.

Minimising unwanted slack in a climbing system is always a high priority, so we designed the sewn eyes to offer a snug fit, firmly holding the karabiner in place and providing an optimal connection to your rope wrench.

The Squirrel FLEX Tether is constructed with contrasting stitching, which remains visible for easy inspections.

RT300A2

Squirrel FLEX 12" Tether,  
supplied with Accessory  
Karabiner

## TECHNICAL INFORMATION

Type	Twin-leg Tether, Polymer Over-mould
Compatibility	ISC APEX/Rope Wrench (all ISC models) RP282 ISC PHLOTICH Pulley KL100 Accessory Karabiner, NOT for PPE (Chest harness attachment only)
Tether Length	310mm (12")
MBS	24kN (5395lbf)

KT300A1/KT300A2

Squirrel FLEX 12" Tether,  
supplied with APEX &  
Accessory Karabiner
